09/23

It was established in 1986 by mechanical engineer Mustafa Kaya.

Our company has entered the industrial kitchen sector with solid foundations and has become a pioneer in the sector.

Acting with the vision of constantly renewing itself and offering innovations to its customers since its establishment, Matçelik Engineering provides services to many different units such as restaurants, hospitals, schools, universities, factories, hotels, industrial facilities and social facilities.

By keeping the expectations and needs of our customers at the forefront, we aim to bring the innovations in the sector together with the customer portfolio.

One of the biggest features of our company is that it produces using quality and durable materials. Our products, which can be used for a long time, emerge by blending with architectural projects. In addition, we make special productions for our customers by providing solutions for the special needs of each project. In this way, we are able to fully meet the expectations of our customers.

Matçelik Engineering brings together each project with quality in line with its own needs, with effective and analytical solutions. Our experienced and expert staff always aims to keep customer satisfaction at the highest level and offers solutions for the needs of our customers.

Matçelik Engineering has gained the appreciation of its customers with its experience in the sector, quality products, special productions and customer satisfaction-oriented service approach. In this direction, it will continue to serve its customers by maintaining its leading position in the sector in the future.

Cookers / Modular 700 Series

Cooker/ Gas

Show Cooker

4012001

4012002

4012003

Code	Dimensions (mm)	Power	Gas Inlet	Price
4012001	400x700x285	12 kW	3/4"	684 €
4012002	800x700x285	24 kW	3/4"	1.170 €
4012003	1200x700x285	36 kW	3/4"	1.712 €

Flame regulated gas taps have safety valve and protected pilot group. In case the flame faded, the gas breaker thermocouple is activated. The burner structure spreads the flame homogeneously to the bottom of the ceiling, efficient combustion is achieved. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel. It can work with LPG and NG, and can be converted without any modification.

4012007

4012008

Code	Dimensions (mm)	Power	Gas Inlet	Price
4012007	400x700x285	15 kW	3/4"	656 €
4012008	800x700x285	30 kW	3/4"	1.158 €

The double burner can be controlled with a single gas tap. The pilot assembly and thermocouple assembly are out of reach of liquids and overflows. It is protected against coarse dirt and liquid spills. In case the flame faded, the gas breaker thermocouple is activated. Due to the double burner, flame adjustment can be made according to different pan sizes. The burner setting can be adjusted between 1.0 kW and 16 kW. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel. It can work with LPG and NG, and can be converted without any modification.

Cooker/ Electric

Wok Cooker

4012004

4012005

4012006

Code	Dimensions (mm)	Power	Electric Inlet	Price
4012004	400x700x285	5,2 kW	380 - 400 V	532 €
4012005	800x700x285	10,4 kW	380 - 400 V	926 €
4012006	1200x700x285	15,6 kW	380 - 400 V	1.170 €

Cast iron with a power of 2.6 kW can operate at 6 different temperature levels. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

4012009

4012010

Code	Dimensions (mm)	Power	Gas Inlet	Price
4012009	400x700x285	15 kW	3/4"	736 €
4012010	800x700x285	30 kW	3/4"	1.318 €

The double burner can be controlled with a single gas tap. The pilot assembly and thermocouple assembly are out of reach of liquids and overflows. It is protected against coarse dirt and liquid spills. In case the flame faded, the gas breaker thermocouple is activated. Due to the double burner, flame adjustment can be made according to different pan sizes. The burner setting can be adjusted between 1.0 kW and 16 kW. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel. It can work with LPG and NG, and can be converted without any modification.

Cooker With Ceramic Glass

4012011

4012012

Code	Dimensions (mm)	Power	Electric Inlet	Price
4012011	400x700x285	5 kW	380 - 400 V	2.210 €
4012012	800x700x285	10 kW	380 - 400 V	4.020 €

Quick heat transfer to the pan is provided by high-powered resistances. The cooking surface is tightly insulated to prevent liquid leakage. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

Induction Cooker

4012013

4012014

Code	Dimensions (mm)	Power	Electric Inlet	Price
4012013	400x700x285	7 kW	380 - 400 V	1.680 €
4012014	800x700x285	14 kW	380 - 400 V	3.150 €

The induction heating system does not directly heat the ceramic surface, and there is no burning on the cooking surface. Maximum efficiency is achieved when energy is transferred directly to the pan. The cooking surface is tightly insulated to prevent liquid leakage. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

Plate Grill /Gas

4012015

4012016

Code	Dimensions (mm)	Cooktop	Power	Gas Inlet	Price
4012015	400x700x285	Smooth	6 kW	3/4"	787 €
4012016	800x700x285	Smooth	12 kW	3/4"	1.212 €
4012017	400x700x285	Ribbed	6 kW	3/4"	840 €
4012018	800x700x285	Ribbed	12 kW	3/4"	1.382 €
4012019	800x700x285	Smooth + Ribbed	12 kW	3/4"	1.350 €
4012020	400x700x285	Smooth - Chrome	6 kW	3/4"	1.063 €
4012021	800x700x285	Smooth - Chrome	12 kW	3/4"	1.818 €
4012022	400x700x285	Ribbed - Chrome	6 kW	3/4"	1.127 €
4012023	800x700x285	Ribbed - Chrome	12 kW	3/4"	1.956 €
4012024	800x700x285	Smooth + Ribbed - Chrome	12 kW	3/4"	1.624 €

Perfect heat distribution is provided on the cooking surface. Flame regulated gas taps have safety valve and protected pilot group. In case the flame faded, the gas breaker thermocouple is activated. Stainless steel, high efficiency burners are used. Flat surfaces are 12 mm thick, corrugated surfaces are 15 mm thick. Chrome-plated surfaces provide extra hygiene and ease of use. It has oil drainage channel and drawer. There are visors on the back and sides of the cooking plate that can be easily removed and cleaned. 2 mm thick AISI 304 quality solid pressed plates welded to the top plate without gaps, easy to clean. The design of the control buttons prevents the leakage of liquid into the panel. It can work with LPG and NG, and can be converted without any modification.

Plate Grill /Electric

4012025

4012026

Code	Dimensions (mm)	Cooktop	Power	Electric Inlet	Price
4012025	400x700x285	Smooth	4.5 kW	380 - 400 V	691 €
4012026	800x700x285	Smooth	9 kW	380 - 400 V	1.042 €
4012027	400x700x285	Ribbed	4.5 kW	380 - 400 V	765 €
4012028	800x700x285	Ribbed	9 kW	380 - 400 V	1.212 €
4012029	800x700x285	Smooth + Ribbed	9 kW	380 - 400 V	1.159 €
4012030	400x700x285	Smooth - Chrome	4.5 kW	380 - 400 V	935 €
4012031	800x700x285	Smooth - Chrome	9 kW	380 - 400 V	1.435 €
4012032	400x700x285	Ribbed - Chrome	4.5 kW	380 - 400 V	1.031 €
4012033	800x700x285	Ribbed - Chrome	9 kW	380 - 400 V	1.669 €
4012034	800x700x285	Smooth + Ribbed - Chrome	9 kW	380 - 400 V	1.616 €

Perfect heat distribution is provided on the cooking surface. Efficient resistances are used that transfer the controlled heat between 50-300 C directly to the plate surface. Flat surfaces are 12 mm thick, corrugated surfaces are 15 mm thick. Chrome-plated surfaces provide extra hygiene and ease of use. It has oil drainage channel and drawer. There are visors on the back and sides of the cooking plate that can be easily removed and cleaned. 2 mm thick AISI 304 quality solid pressed plates welded to the top plate without gaps, easy to clean. The design of the control buttons prevents the leakage of liquid into the panel.

Lavastone Chargrill / Gas

4012035

4012036

4012037

Code	Dimensions (mm)	Power	Gas Inlet	Price
4012035	400x700x285	6 kW	3/4"	945 €
4012036	800x700x285	12 kW	3/4"	1.616 €
4012037	1200x700x285	18 kW	3/4"	2.084 €

Perfect heat distribution is provided on the cooking surface. There is an oil guiding system suitable for cooking products with high oil content. There is a cooking surface consisting of sheet metal grids. Lavastones with high heat capacity are used. Flame regulated gas taps have safety valve and protected pilot group. In case the flame faded, the gas breaker thermocouple is activated. Stainless steel, high efficiency burners are used. Each burner is controlled by separate taps, different parts of the grill can be cooked at different temperatures. It has oil drainage channel and drawer. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel. It can work with LPG and NG, and can be converted without any modification.

Water Chargrill / Gas

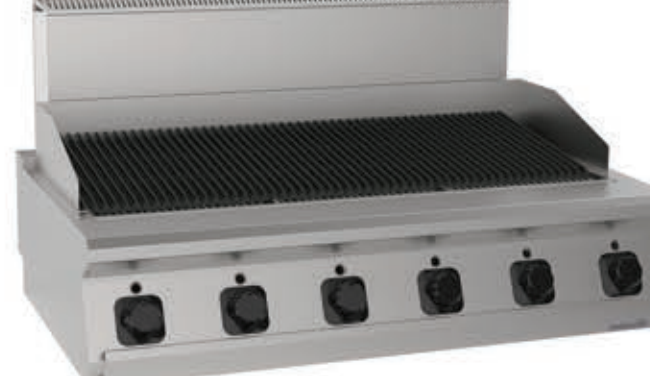

4012038

4012039

4012040

Code	Dimensions (mm)	Power	Gas Inlet	Price
4012038	400x700x285	6 kW	3/4"	968 €
4012039	800x700x285	12 kW	3/4"	1.669 €
4012040	1200x700x285	18 kW	3/4"	2.148 €

Perfect heat distribution is provided on the cooking surface. There is an oil guiding system suitable for cooking products with high oil content. It has a cooking surface consisting of cast grills. Flame regulated gas taps have safety valve and protected pilot group. In case the flame faded, the gas breaker thermocouple is activated. Stainless steel, high efficiency burners are used. Each burner is controlled by separate taps, different parts of the grill can be cooked at different temperatures. It has oil drainage channel and drawer. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel. It can work with LPG and NG, and can be converted without any modification. Due to the evaporation chamber, a more humid cooking environment is provided.

Digital Fryer / Electric

4012041

4012042

Code	Dimensions (mm)	Capacity	Power	Electric Inlet	Price
4012041	400x700x850	16 lt	9 kW	380 - 400 V	2.060 €
4012042	800x700x850	2*16 lt	18 kW	380 - 400 V	3.900 €

Cooking is provided in the most efficient way thanks to the digital system that allows precise heat adjustment. Due to the resistances outside the chamber, the oil chamber is designed to be easily cleaned. Specially designed high efficiency resistors reach fast regime and heat the chamber evenly from outside. Unlike the models where the resistances are in oil, the oil is protected from local overheating and its life is extended. Due to its V-shaped chamber, sediments, residues and water from food accumulate in the cold zone at the bottom. It has the feature of recording 8 different programs with different language options. The oil discharge chamber has a filter and a movable system to provide convenience and safety to the user. It has a limit thermostat protected against overheating. It has a stainless steel basket. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

Digital Fryer / Gas

4012045

4012046

Code	Dimensions (mm)	Capacity	Power (Gas)	Gas Inlet	Power (Electric)	Electric Inlet	Price
4012045	400x700x850	16 lt	20 kW	3/4"	0.1 kW	220 - 230 V	2.418 €
4012046	800x700x850	2*16 lt	40 kW	3/4"	0.1 kW	220 - 230 V	4.537 €

Cooking is provided in the most efficient way thanks to the digital system that allows precise heat adjustment. The flame formed by the burners is circulated around the cooking chamber. Thanks to the materials that provide high thermal conductivity, the calorie of the circulating flame is transferred into the chamber with high efficiency. Burners and flame channels are completely outside the chamber. Unlike the models where the burner channels are in oil, the oil is protected from local overheating and its life is extended. Due to its V-shaped chamber, sediments, residues and water from food accumulate in the cold zone at the bottom. It has the feature of recording 8 different programs with different language options. The oil discharge chamber has a filter and a movable system to provide convenience and safety to the user. It has a limit thermostat protected against overheating. It has a stainless steel basket. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

Fryer/ V-Type Chamber - Filter - Electric

4012043

4012044

Code	Dimensions (mm)	Capacity	Power	Electric Inlet	Price
4 0 1 2 0 4 3	400x700x850	16 lt	9 kW	380 - 400 V	1.850 €
4 0 1 2 0 4 4	800x700x850	2*16 lt	18 kW	380 - 400 V	3.481 €

Due to the resistances outside the chamber, the oil chamber is designed to be easily cleaned. Specially designed high efficiency resistors reach fast regime and heat the chamber evenly from outside. Unlike the models where the resistances are in oil, the oil is protected from local overheating and its life is extended. Due to its V-shaped chamber, sediments, residues and water from food accumulate in the cold zone at the bottom. The oil discharge chamber has a filter and a movable system to provide convenience and safety to the user. It has a limit thermostat protected against overheating. It has a stainless steel basket. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

Fryer / Worktop - Electric

4012056

4012057

Code	Dimensions (mm)	Capacity	Power	Electric Inlet	Price
4 0 1 2 0 5 6	400x700x285	8 lt	6 kW	380 - 400 V	957 €
4 0 1 2 0 5 7	800x700x285	2*8 lt	12 kW	380 - 400 V	1.722 €

It has a limit thermostat protected against overheating. It has a stainless steel basket. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. In countertop models, the resistance is in the chamber, which can be rotated during cleaning.

Chip Scuttle

4012051

Code	Dimensions (mm)	Power	Electric Inlet	Price
4 0 1 2 0 5 1	400x700x285	1 kW	220 - 230 V	489 €

A long-life ceramic heater, resistant to liquid and impact, is used. There is a thermostat with protection against overheating. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof.

Pasta Cooker/ Electric

4012047

4012049

Code	Dimensions (mm)	Capacity	Power	Electric Inlet	Price
4 0 1 2 0 4 7	400x700x850	15 lt	8 kW	380 - 400 V	1.631 €
4 0 1 2 0 4 9	400x700x285	15 lt	8 kW	380 - 400 V	989 €

Due to the resistances outside the reservoir, the water reservoir is designed to be easily cleaned. Specially designed high efficiency resistors reach fast regime and heat the chamber evenly from outside. In cabinet models, the water discharge system is connected to a drain. It has a water filling system with a solenoid valve. It has a limit thermostat protected against overheating. It has a stainless steel basket. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

Bain Marie/ Electric

4012052

4012053

4012054

4012055

Code	Dimensions (mm)	Power	Electric Inlet	Price
4 0 1 2 0 5 2	400x700x850	0.65 kW	220 - 230 V	926 €
4 0 1 2 0 5 3	800x700x850	1.3 kW	220 - 230 V	1.410 €
4 0 1 2 0 5 4	400x700x285	0.65 kW	220 - 230 V	642 €
4 0 1 2 0 5 5	800x700x285	1.3 kW	220 - 230 V	1.031 €

Due to the resistances outside the reservoir, the water reservoir is designed to be easily cleaned. The silicone resistance on the bottom of the bowl is in a wide structure compatible with the bottom, it heats the bowl evenly. It has a limit thermostat protected against overheating. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

It can work with LPG and NG, and can be converted without any modification.

Induction Cooker

4013013

Code

4013014

Code	Dimensions (mm)	Power	Electric Inlet	Price
4013013	400x900x285	10 kW	380 - 400 V	2.184 €
4013014	800x900x285	20 kW	380 - 400 V	4.095 €

The induction heating system does not directly heat the ceramic surface, and there is no burning on the cooking surface. Maximum efficiency is achieved when energy is transferred directly to the pan. The cooking surface is tightly insulated to prevent liquid leakage. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

Perfect heat distribution is provided on the cooking surface. Flame regulated gas taps have safety valve and protected pilot group. In case the flame faded, the gas breaker thermocouple is activated. Stainless steel, high efficiency burners are used. Flat surfaces are 12 mm thick, corrugated surfaces are 15 mm thick. Chrome-plated surfaces provide extra hygiene and ease of use. It has oil drainage channel and drawer. There are visors on the back and sides of the cooking plate that can be easily removed and cleaned. 2 mm thick AISI 304 quality solid pressed plates welded to the top plate without gaps, easy to clean. The design of the control buttons prevents the leakage of liquid into the panel. It can work with LPG and NG, and can be converted without any modification.

4013037	1200x900x285	24 kW	3/4"	2.705 €

Perfect heat distribution is provided on the cooking surface. There is an oil guiding system suitable for cooking products with high oil content. There is a cooking surface consisting of sheet metal grids. Lavastones with high heat capacity are used. Flame regulated gas taps have safety valve and protected pilot group. In case the flame faded, the gas breaker thermocouple is activated. Stainless steel, high efficiency burners are used. Each burner is controlled by separate taps, different parts of the grill can be cooked at different temperatures. It has oil drainage channel and drawer. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel. It can work with LPG and NG, and be converted without any modification.

4013038	400x900x285	8 kW	1/2"	1.329 €
4013039	800x900x285	16 kW	1/2"	1.956 €
4013040	1200x900x285	24 kW	1/2"	2.562 €

Perfect heat distribution is provided on the cooking surface. There is an oil guiding system suitable for cooking products with high oil content. It has a cooking surface consisting of cast grills. Flame regulated gas taps have safety valve and protected pilot group. In case the flame faded, the gas breaker thermocouple is activated. Stainless steel, high efficiency burners are used. Each burner is controlled by separate taps, different parts of the grill can be cooked at different temperatures. It has oil drainage channel and drawer. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel. It can work with LPG and NG, and can be converted without any modification. Due to the evaporation chamber, a more humid cooking environment is provided.

Digital Fryer/ Electric

4013041

4013042

Cooking is provided in the most efficient way thanks to the digital system that allows precise heat adjustment. Due to the resistances outside the chamber, the oil chamber is designed to be easily cleaned. Specially designed high efficiency resistors reach fast regime and heat the chamber evenly from outside. Unlike the models where the resistances are in oil, the oil is protected from local overheating and its life is extended. Due to its V-shaped chamber; sediments, residues and water from food accumulate in the cold zone at the bottom. It has the feature of recording 8 different programs with different language options. The oil discharge chamber has a filter and a movable system to provide convenience and safety to the user. It has a limit thermostat protected against overheating. It has a stainless steel basket. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

Code	Dimensions (mm)	Capacity	Power	Electric Inlet	Price

Digital Fryer/ Gas

4013045

4013046

Cooking is provided in the most efficient way thanks to the digital system that allows precise heat adjustment. The flame formed by the burners is circulated around the cooking chamber. Due to the materials that provide high thermal conductivity, the calorific value of the circulating flame is transferred into the chamber with high efficiency. Burners and flame channels are completely outside the chamber. Unlike the models where the burner channels are in oil, the oil is protected from local overheating and its life is extended. Due to its V-shaped chamber; sediments, residues and water from food accumulate in the cold zone at the bottom. It has the feature of recording 8 different programs with different language options. The oil discharge chamber has a filter and a movable system to provide convenience and safety to the user. It has a limit thermostat protected against overheating. It has a stainless steel basket. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

4 0 1 3 0 5 3	800x900x850	1.5 kW	220 - 230 V	1.733 €

Due to the resistances outside the reservoir, the water reservoir is designed to be easily cleaned. The silicone resistance on the bottom of the bowl is in a wide structure compatible with the bottom, it heats the bowl evenly. It has a limit thermostat protected against overheating. The 2 mm thick AISI 304 quality pressed top plate is easy to clean and maintain, and it is shockproof. The design of the control buttons prevents the leakage of liquid into the panel.

## Bratt Pan/ Gas

4013071

Code	Dimensions (mm)	Capacity	Power	Gas Inlet	Price
4013071	800x900x850	80 lt	20 kW	3/4"	3.700 €
4013072	1200x900x850	120 lt	30 kW	3/4"	5.300 €

Manual tilting,

Device body is made of stainless steel sheet,

Homogeneous heat distribution and preservation thanks to 10mm duplex stainless steel sheet on the bottom of the pan,

The tilting device can be easily rotated without the need for force with its special mechanism and the tilting angle is 85 degrees,

Ability to set temperature between 50-300°C with multi-stage thermostat,

It can work with LPG, NG and derivatives of these gases (G31, G25, G25.1, G27, G2.350) and can be converted without any

modification (only with injector change),

Gas valve; with pilot flame and thermocouple, in a structure to cut the gas automatically in case the flame goes out (with safety valve),

Automatic ignition button

## Bratt Pan/ Electric

4013073

Code	Dimensions (mm)	Capacity	Power	Electric Inlet	Price
4013073	800x900x850	80 lt	12 kW	380 - 400 V	3.572 €
4013074	1200x900x850	120 lt	20 kW	380 - 400 V	5.061 €

Manual tilting,

Device body is made of stainless steel sheet,

The cover is double-walled from stainless steel sheet, specially formed in terms of strength,

Homogeneous heat distribution and preservation thanks to 10mm duplex stainless steel sheet on the bottom of the pan,

The tilting device can be easily rotated without the need for force with its special mechanism and the tilting angle is 85 degrees,

Faucet mounted to fill the pan with water for cleaning or use,

## Boiling Pan/ Gas

4013075

Code	Dimensions (mm)	Capacity	Power	Gas Inlet	Price
4013075	800x900x850	100 lt		3/4"	4.983 €
4013076	800x900x850	150 lt		3/4"	5.656 €

Indirect Heating

Temperature can be adjusted between 60-180°C with multi-stage thermostat

Cooking indirectly with the oil circulating around the boiler with the bain-marie system

The boiling temperature of the oil around the boiler is above 200°C,

Water filling (cold/hot) and discharge valves are mounted on the device,

Safe discharge valve against unintentional opening, specially shaped for the discharge of the cooked material

Safety system that automatically cuts off the energy in case of any malfunction (limit thermostat),

Gas valve; with pilot flame, minimum-maximum flame and thermocouple, in a structure to cut the gas automatically in case the

flame faded(safety valve)

Automatic ignition button

It can work with LPG, NG and derivatives of these gases (G31, G25, G25.1, G27, G2.350) and can be converted without any

modification (only with injector change),

Gas burner in the form of stainless tubular,

The cover is double-walled from stainless steel sheet, specially formed in terms of strength,

Device body is made of stainless steel sheet,

\*

Legs are adjustable stainless pipe\*

Stainless steel construction and shell designs provides long-term use.

Enamel-coated cooking tray suitable for food safety is 900 mm in diameter.

The control panel is simple, understandable and easy to use.

There is a premix burner technology using a premixed combustion system.

Due to the electronic combustion management system, combustion takes place after the gas and the air required for combustion are homogeneously mixed in the combustion head.

In case the flame faded, the gas breaker is equipped with a safety device.

According to the adjustable table speed, the temperature setting of the upper and lower heating groups, which can be controlled separately, can be adjusted at the desired power, different cooking programs can be made.

The adjustment system, which allows very fast conversion according to gas pressure and gas type, provides convenience to the customer and service.
